Interested in Vacuum Basics?

Pfeiffer Vacuum has FREE basics webinar training

Vacuum Fundamentals for Scientists and Engineers

Are you new to the world of vacuum technology? Are you a graduate student, post-doc, or technician working with vacuum equipment in the lab? Do you need to brush up on your vacuum fundamentals? If you answered 'yes' to any of these questions, please join Pfeiffer Vacuum for a webinar on Vacuum Fundamentals for Scientists and Engineers! This webinar will provide a practical introduction to vacuum principles, an overview of vacuum pumping and measurement technologies, troubleshooting and maintenance of vacuum equipment, and tips and tricks to keep your vacuum systems running smoothly. Multiple sessions available.

- **Ongoing:** New publication? Data collected at the RSC? Click to tell us!  
  - Still writing? Check out our new easy acknowledgement templates.
Safety Side Note:

Working with hazardous materials?

Use the pink process form so your materials are labeled even if the containers cannot be labeled.

Pink process forms should be used anytime you are working with strong acids, bases, or other hazardous materials. In the event of an evacuation (or even just you using the restroom) your materials need to be easily identifiable in your absence.

*** Remember, you need an NFC enabled ID to enter the facility. ***

SKY Happiness Retreat @ UF

We are hosting the SKY Happiness Retreat on September 9-11, a mental health resource that several students, faculty, and staff can benefit from. Studies have shown that the techniques have helped improve the overall health of adults. Research from Yale University comparing state-of-the-art well-being interventions showed that SKY significantly benefits six well-being outcomes: depression, stress, mental health, mindfulness, positive affect, and social connectedness. Mainstream media has also covered the benefits of the SKY breathing techniques, including most recently, a Time magazine article and a Harvard Business Review article. Here at UF, more than 2000 students and faculty have benefited from this retreat over the past 10 years. A full scholarship is offered for select participants on a first come, first served basis through an application process, and requires attendance to all sessions of the retreat. Limited spots are available.

Apply for Full Scholarship
It was an insurance scam. I mean, come on, the guy who blew up it was the dude's son. Like, I know they say they're estranged but they were clearly in on it together for the insurance money.

There were delays during construction and Vader knew it had design flaws - it was never going to make back its investment so they staged a "rebel raid". And Vader was the only one to survive. It's so obvious.
